

# *introducing* the **Morey boogie.**

**Unbreakable. Super, super light. 3 totally closed cell plastic foams welded together form its rugged core and tough, smooth dimpled iridescent skins.**

The boogie is comfortable under you all the time. It doesn't chafe. It won't break. It can't sink or leak. A billion tiny flexible plastic bubbles completely sealed together make it so.

The boogie is fast. Partly because it is covered with plastic porpoise skins. Partly because it weighs only 3 1/2 pounds; yet, has the volume of today's small board. It is fast because the wide flat bottom gathers and holds air beneath it. You conform plane to the exact contours of the ever changing wave.

The physics of riding is all different when you come down off the board and **BECOME FLEXIBLE TO THE WAVE**. Hop completely over guys and skim shallow reefs in your way. Warp yourself into unbelievable maneuvers no one has ever done. Developed originally in Hawaii for "unridable" coral and urchin loaded reefs, I got completely jazzed when I discovered how using my whole body and mind to plan, twist, flex and bounce the unique boogie shape I could make even thick hollow, 7, 8, and 9 foot waves **WITHOUT A FIN!**

If you like, we'll send you one. Instructions, packaging, taxes and rapid shipping all paid for an even \$37.00 total. (In Calif. . . . elsewhere in U.S. add \$5.00 air freight). Really good in the snow too. Picture it.

Send the money order, cash or check to me, Tom Morey, and we'll send yours off immediately (as your check clears).

184 Chestnut, Carlsbad, Calif. 92008 (714) 729-0785.

*Tom Morey & Company*

Enclosed is \_\_\_\_\_ for \_\_\_\_\_ genuine Morey boogies.

your name \_\_\_\_\_ correct mailing address and zip \_\_\_\_\_

I understand that if anything at all is wrong with them and its your fault you'll fix it free. Boogie me.
