## The Best Traction Grip in the World for Board Sports

### Cove Pad: Dynamic Grip Features

#### GRIP SURFACE- NEW State of the art molded grip technology.

**Molded Skin Surface:** All grooves and contact surfaces are molded with a sealed skin. Sealed, no saw cut exposed internal material.

**Micro Grip Texture:** The top contact surface of the pad has a molded-in micro grip texture for instant grip and stance set.

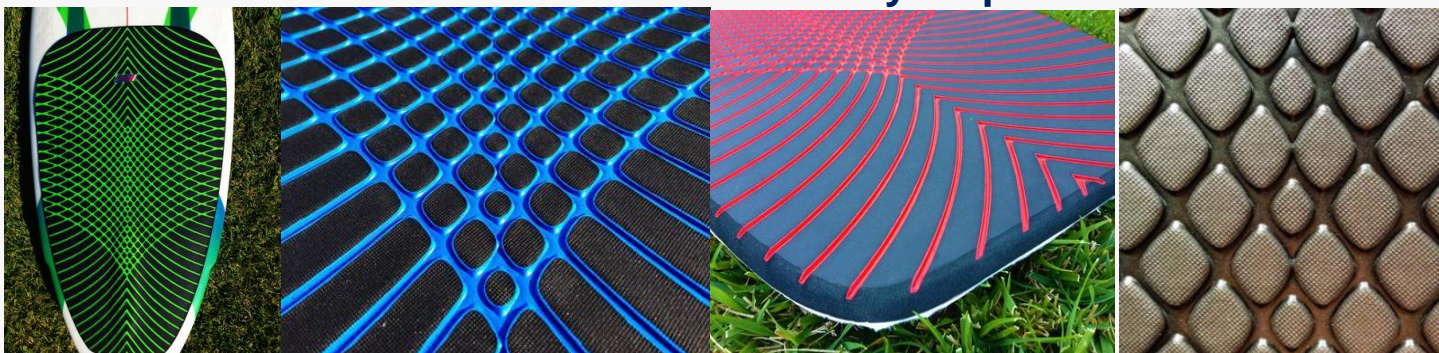

**Grooves:** Allow water to move off the contact surface for instance grip and body contact to the pad, like a tire tread on a wet surface.

**High Energy Memory Compound:** Allows deep compression and quick rebound memory. No slow compression set / smashed pad.

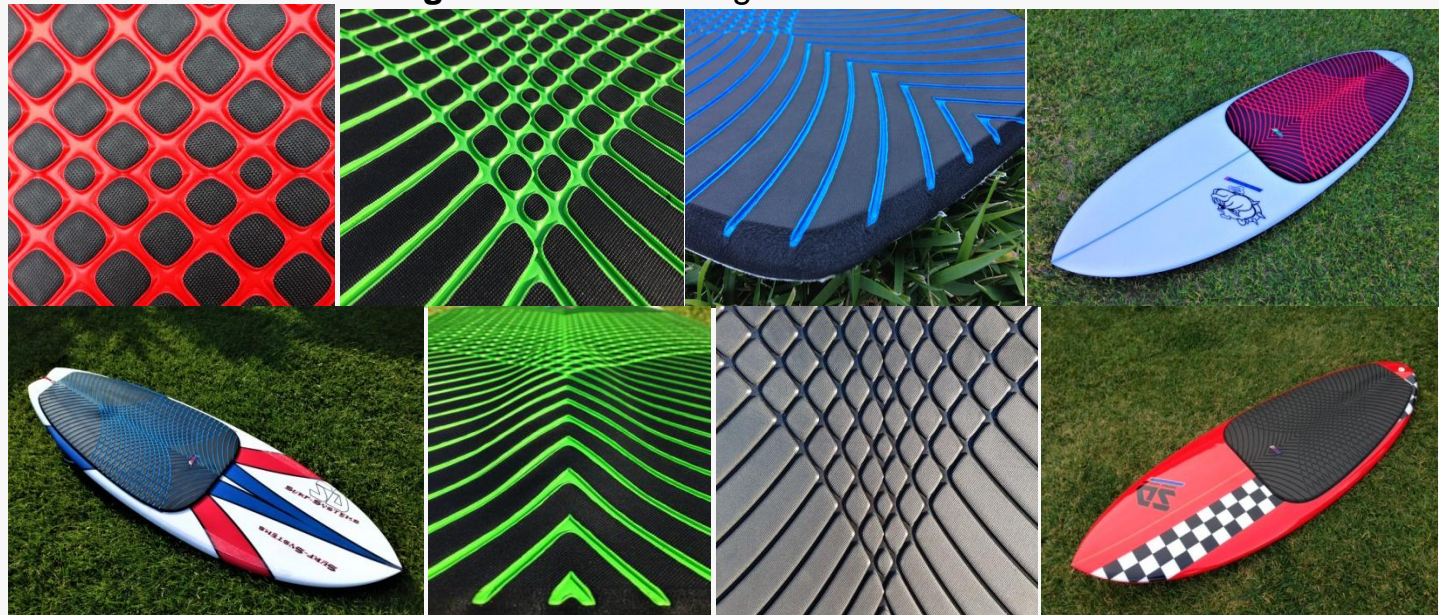

**Smooth on the Skin and Zero water absorption.**

**Grooved Flat Deck:** Instant Full Contact to the Control Surfaces for On The Fly Stance Release and Re-grip.

### The COVE PAD DiamondFly Grip

**One Smooth Beveled Edge:** No tears or snags

**Raised Tail Block:** Foot/Fin Leverage for Hard Turn Control

**CUSTOM SHAPED TO YOUR BOARD DIMENSIONS: SEE ORDER FORM ON BACK**
